

Strategic Plan 2021 - 2030

1. To own and manage areas of land in Wales, including at least one large area.

1.1. *Cambrian Wildwood, or Coetir Anian, is focused on an area in the north of the Cambrian Mountains, to the south and east of the Dyfi estuary. Our aim here is to hold around 1,200 hectares of land, and work in partnership with neighbouring landowners such as Welsh Government towards a long-term goal of creating 3,000 hectares of wildland.*

Current status:

125 year lease on Bwlch Corog 142 hectares

Plans:

Pursue opportunities for acquisition of properties neighbouring Bwlch Corog. Increase fundraising for land purchase following successful proposal.

Not a priority at present, this will be a separate endeavour to the current priority of developing and funding project on existing property from 2022.

However, current timing for this is favourable, with UN decade of ecosystem restoration and increased public appetite for nature restoration.

1.2. *To initiate or support local projects in other parts of Wales when opportunities arise. Potential areas are: Rhinogydd in Snowdonia National Park; Pembrokeshire; South Brecon Beacons/Heads of Valleys.*

Current status:

None

Plans:

Continue to communicate with individuals and groups from other parts of Wales who contact us with ideas.

1.3. *Pursue opportunities for small areas of wild or potentially wild land near to urban centres as potential sites for projects, working closely with local communities.*

Current status:

None

Plans:

Re-start discussions with Welsh Government on Community Asset Transfer of Skellys, 1.5 hectares on outskirts of Aberystwyth
