

## Strategic Plan 2021 - 2030

***4. To encourage people to access and enjoy our sites by providing low impact walking, cycling, wheelchair and horse-riding routes, facilitating responsible wild camping and enabling a broad cross-section of society to visit the wild land.***

***4.1. Access routes and wild camping pitches will be established and maintained where appropriate. Signage will welcome visitors to the site and provide direction for public and permissive bridleways. Our policy of free and open access will be publicised on our websites.***

### **Current status:**

The bridleway along boundary with Cefn Coch has been fenced off to enable riders to use Public and Permissive Bridleway sections without concern about our resident stallion. Public and permissive bridleway sections are signposted with our own logoed signs have been installed.

Trails are mown through molinia annually to enable access around site.

Other trails created by the large herbivores enable more access.

Bracken slashing annually plus grazing maintains some open areas suitable for wild camping in the bracken-woodland edge area.

Compost toilet completed, to provide basic facility for visitors to site.

### **Plans:**

Continue maintenance.
