

Invitation to Quote: *Firewood Shed at Bwlch Corog*

Coetir Anian would like to invite quotes for the job of building a wood store close to the round shed at Bwlch Corog, to store and dry approx. 10m³ firewood.

The structure needs to “fit” into its surroundings and it needs to be wide rather than high to maintain the views from the roundhouse.

Simple design, approximate measurements: W5m x D2m x H1m, with waterproof roof e.g. metal or rubber liner. We had thought of using pallets as the floor and sides – something similar to this:

There is some flexibility in the design.

For more information or to submit a quote please contact:
