

## Invitation to Quote: *Hearth Extension*

Coetir Anian would like to invite quotes for the job of laying concrete and fixing slate/stone around the existing hearth (120cm x 90cm) to improve fire safety in the shed.

We want to cover the area between the two shelving units (approx. 240cm x 150cm) with slate/stone to create a larger hearth, clear of loose combustible material.

There is a lot of flexibility in the finish: as long as it looks consistent with the rest of our shed and does the job of reducing the risk of fire.

For more information or to submit a quote please contact;
